ERD

CONSTRAINTS

Table	Column(s)	Check	Default
Bookings	PhoneNumber	#-###-###-####	
Bookings	AlternatePhoneNumber	#-###-###-####	
Passengers	PhoneNumber	#-###-###-####	
Payments	Amount	> 0	
Payments	Timestamp		Current Date/Time
Flights	IsFull		N
Flights	DepartureAirport, ArrivalAirport	Cannot be the same	

indicates any digit between 0 and 9

IDENTITY PROPERTY

Table	Column	Seed	Increment
Airports	AirportCode	1000	1

Assuming the tables already have data in them, use the Alter Table statement to alter the tables as described

- a. Passengers Table: add an 8-character variable length mandatory column called AgeGroup. AgeGroup will only allow 'Child', 'Adult', or 'Senior'; and will default to 'Adult'
- b. Flights Table: add a default of 'N' to the Cancelled column
